Objective

Enthusiastic and results-driven Software Engineer with a proven track record in building and maintaining cutting-edge, custom web applications. Seeking a challenging role that leverages my expertise in JavaScript, Python, PHP, and cloud technologies to contribute to innovative and impactful projects.

Experience

Full Stack Developer

Mar 2022 – Dec 2023

Troy Web Consulting

Troy, NY

- Developed and maintained custom Laravel PHP applications using Vue.js, ensuring high-quality and responsive web applications using MVC app architecture.
- Led the migration of legacy applications to modern development standards, enhancing overall system efficiency.
- Collaborated with clients, designers, project managers, and QA teams to ensure applications met specified requirements.
- Contributed to various projects, including social media integrations, invoicing systems, progressive web applications, and serverless/cloud migrations, often within the same time frame.
- Coordinated with team leads and project managers to deliver projects in a timely manner, ensuring enough time is left over for testing and refactoring.

JavaScript Application Developer

Mar 2020 – Mar 2022

Atlas Copco

Voorheesville, NY

- Design and implement Project Management dashboards using the SAP UI5 JavaScript framework
- Modify SAP BW database schema to meet the needs of frontend applications
- Analyze data and build reports detailing pricing trends

- Meet with cross org stakeholders to plan and design the user experience of applications
